

**D Mammal-census**  
 Register the data on <https://hekkefugloevervakingen.nina.no>, or send this scheme to your regional contact (addresses on the website).  
 Scheme version 2023

**Norwegian bird monitoring**

**Send this report also if no mammals are observed!**

All mammals (including domestic/farm animals) observed from starting point onwards to the end point in the route. If many individuals are observed of one species (for example small rodents or domestic animals), please estimate to the nearest 10 or 100 as good as possible.

Include only individuals **alive!**

RUTENR.:

SPECIES	N of INDIVIDUALS	COMMENTS	SPECIES	N of INDIVIDUALS	COMMENTS
Squirrel			Domestic animals		
Beaver			Domestic cow		
European water vole			Goat		
Lemming			Horse		
Small rodent sp.			Sheep

Arctic fox					
Red fox					
Wolverine					
Mink					
Otter					
Pine marten					
Badger					
Stoat					
Least weasel					
European polecat					
Moose					
European roe deer					
Red deer					
Reindeer					
Wild boar					
Muskox					

**If you observed no mammals, please mark with x here:**

For species groups where species determination is difficult in the field, we use wider groups (for example bats, shrews, and for small mammals we distinguish between mouse sp. and lemmings).
